

Was the 2004 Presidential Election Stolen? The Evidence That Points to a Rigged Election

The 2004 presidential election was one of the closest and most controversial in American history. George W. Bush narrowly defeated John Kerry by a margin of just 118,610 votes in Ohio. This slim margin of victory has led to widespread speculation that the election may have been stolen.

There is a significant amount of evidence that supports this claim. In the weeks leading up to the election, there were numerous reports of voter suppression and intimidation. On Election Day, there were widespread reports of voting irregularities, including long lines, broken voting machines, and missing ballots. In the days and weeks after the election, there were numerous allegations of fraud and misconduct.

One of the most compelling pieces of evidence that the election may have been stolen is the exit polls. Exit polls are surveys of voters that are

conducted as they leave the polls. These polls are used to project the results of the election. In the 2004 election, the exit polls showed Kerry winning Ohio by a comfortable margin. However, the official results showed Bush winning the state by a narrow margin. This discrepancy between the exit polls and the official results is highly suspicious.

Another piece of evidence that supports the claim that the election may have been stolen is the evidence of voting irregularities. There were numerous reports of long lines, broken voting machines, and missing ballots on Election Day. These irregularities made it difficult for people to vote, and they may have affected the outcome of the election.

In the days and weeks after the election, there were numerous allegations of fraud and misconduct. These allegations included claims of voter intimidation, ballot stuffing, and hacking. While some of these allegations have been debunked, others remain credible.

The evidence that the 2004 presidential election may have been stolen is compelling. There is evidence of voter suppression, intimidation, voting irregularities, and fraud. This evidence raises serious questions about the legitimacy of the election results.

If the 2004 presidential election was stolen, it would have a profound impact on American democracy. It would mean that our elections are not free and fair, and that our votes do not count. This would be a grave threat to our democracy.

We must demand a full and independent investigation into the 2004 presidential election. We need to know the truth about what happened, and we need to hold those responsible accountable. Only then can we restore

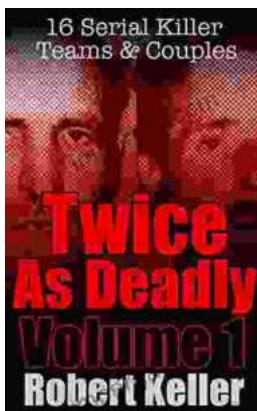

confidence in our electoral system and ensure that our democracy remains strong.
